Website User Manual
CCPD Fellowship Opportunities Website
sufellowships.org

This site is intended for students to find what fellowships they were eligible for. Fellowships are monetary awards usually based on academic merit rather than need. The main function of the site is the ability to filter fellowships to what requirements you meet.

1. The top navigation bar has three sections to click on.
   a. Browse Fellowships is the home page of the site. This can be used to reset the filters you have chosen.
   b. Return to SU Fellowships & Scholarship Home opens a new tab to the CCPD fellowship site.
   c. About takes you to a page about the Capstone team that made the website as their senior seminar in software engineering.

2. There are five different filters that can be used, these are the same as the Fellowship details and requirements below.
   a. Level of study, to show undergraduate or graduate level Fellowships.
   b. Location of study, to distinguish domestic and international Fellowships.
   c. Minimum GPA, to filter fellowships with a higher GPA requirement than the number clicked.
   d. Requires US Citizen/National/Permanent Resident.
   e. Requires Campus Endorsement or Nomination.

3. Searching is available to find fellowships by their name.

4 Barry Goldwater Scholarship

5 National scholarship in the natural sciences, engineering and mathematics to identify and support college sophomores and juniors who show exceptional promise of becoming the US' next generation of research leaders in these fields. Scholarships entail up to $7,500 a year to help cover costs associated with tuition, mandatory fees, books, room and board.
